EDUCATION

BBDNIIT, Lucknow, India

Expected 2027

Bachelor of Technology (B.Tech), Computer Science & Engineering

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, C++, HTML5, CSS3, SQL

Frontend: React.js, Next.js, Tailwind CSS v4, Material UI, Bootstrap 5, Vite

Backend & DB: Node.js, Express.js, REST APIs, MongoDB, PostgreSQL, Prisma, MySQL

Auth & Cloud: Auth.js/NextAuth v5, Passport.js, AWS (EC2, S3, IAM), Cloudinary, Vercel

Tools: Git, GitHub, VS Code, Postman, Mapbox GL JS, MongoDB Atlas

EXPERIENCE

AWS & Cloud Computing Summer Trainee — GRAS tech (Learnovate)

Jun 2026 – Aug 2026

- Completed a 90-hour project-based training on AWS & Cloud Computing, gaining hands-on exposure to compute, storage, and IAM fundamentals.
- Applied cloud concepts to a guided project; earned an ISO 9001:2015-certified Certificate of Completion under the AWS Partner Network.

PROJECTS

RenewVault — Subscription & Renewal Tracking Dashboard (renewvault.me)

Next.js 16, React 19, TypeScript, Tailwind CSS v4, PostgreSQL, Prisma, Auth.js/NextAuth v5, Resend, Vercel Blob

- Co-own a live, full-stack MERN-style dashboard end-to-end, shipping a multi-currency spending summary (INR/USD/EUR/GBP), filterable and sortable renewal lists with live per-status counts, and status-colored renewal cards.
- Built the mobile-first navigation system — a dedicated top bar and bottom tab bar for small screens alongside a collapsible desktop sidebar — plus empty-state UX for zero-data and no-match search/filter cases.
- Engineered a token-driven design system with CSS custom properties for consistent theming across the app, and fixed a sidebar-collapse layout bug affecting the mobile calendar popover.
- Collaborated with a backend teammate on shared REST API contracts (GET/POST/PATCH/DELETE for renewals, dashboard stats) and Prisma/PostgreSQL schema, and automated renewal-reminder emails via Resend and scheduled cron jobs.

Wanderly — Full-Stack Rental Listing Platform

Node.js, Express, MongoDB, EJS, Passport.js, Cloudinary, Mapbox GL JS

- Built an Airbnb-style rental platform (MVC) with full CRUD, Passport.js authentication, Cloudinary image uploads, and Mapbox geocoding.
- Designed a custom CSS-variable color system and enforced server-side validation with Joi and custom error-handling middleware.

Weather App — Real-Time Weather Dashboard

React.js (Vite), Material UI, REST API

- Built a responsive weather app fetching real-time conditions via REST API, using modular MUI components for clean state management.

CERTIFICATIONS

- AWS & Cloud Computing — GRAS tech (Learnovate) — Cert. No. GRAS/PBT/AWS/001
- Data Structures and Algorithms (DSA) in C++ — Apna College
- Delta — Full Stack Web Development — Apna College
